Pruning & Cutting

Felco 6

Comfortable to use and every bit as sturdy and powerful as all other Felco models, this tool is ideal for small pruning work such as grape vines, shrubs, and young trees. It is also the first choice of many florists. With a screw-mounted anvil blade, the overall shorter blade style facilitates closer cutting to the stem of the plant.

Length: 7 1/4 inches (19.5cm) Weight: 7.5oz (210g).

1 per pack

Felco 9

Felco itself states that this pruner sets the standard for high leverage and effortless pruning. It is identical to the Felco 7, except for the rotating handle. Light alloy handles are shaped to act as an extension of the forearm and the anvil blade handle is designed to prevent the pruner from sliding through your hand. Hollow-ground, this Swiss precision-hardened steel blade features a wire-cutting notch. The blades are set on dowel pins for easy maintenance and replacement. All of this and it's designed just for lefties.

Length 8 1/4 inches (21cm) Weight 8.7oz (245g).

1 per pack

ARS 15cm Folding Saw 210-DX

Probably the most popular folding pruning saw being used in the South African vineyard and orchard industry at the moment, also known as the CAP-210 saw. This saw comes with a tough, injection moulded handle which makes it difficult to break. The blade is hard chrome plated to eliminate rust, and taper ground to prevent it sticking in the cut. Keeping the blade open is easy with the very simple catch which hooks onto the blade and locks in place.

Total length when open is 350mm and the weight is 140grams.

This 210-DX is very handy for keeping in your pocket, or in one of the leather holsters we can supply. Keep one in your vehicle for any odd pruning job that may arise.

As with all ARS pruning saws the 210-DX works on the pull stroke for safety.

1 per pack

ARS 160-0.6 Cut & Hold Snipper Long Reach

The 160-0.6 cut and hold pruner is ideal for cutting roses and other plants where there is a possibility of getting injured by the thorns. The 60cm long handles provide extra reach to get into the bushes but at the same time keep your hands away from thorns or delicate stems. Also ideal for harvesting cut flowers that have long delicate stems that you would not like to damage [lilies are a good example] The cutting head has an integrated "cut and hold" grip to hold flowers or branches that have been cut off, for easy removal from the plant. The rotating arm enables the user to make cuts from any angle. Super lightweight design, but still incredibly strong.

Length : 62cm.

Weight : 360g.

Pruning & Cutting

ARS 17cm Folding Saw Z-17

The Z-17 folding saw has a larger handle than the 210-DX but still has a straight blade.

This saw also has a slightly longer blade [170mm] than the 210-DX saw [150mm] and comes with a tough, injection moulded handle that is designed for comfort and safety. The blade is hard chrome plated to eliminate rust and the precision ground teeth are razor sharp, ensuring a fast, clean cut. The Z-17's blade is locked in place with a spring-loaded plastic clip that activates as soon as you open the blade.

Spare catch sets and nut/bolt sets are available.

Total length when open is 383mm and the weight is 175grams.

As with all ARS pruning saws this works on the pull stroke for safety.

1 per pack

ARS 18cm Folding Saw Curved Blade GR-18L

We have recently added the GR-18L folding saw, which has a curved blade to the range of ARS saws that we offer to the South African market. This folding saw has a very comfortable, virtually unbreakable grip that is slightly larger than the handle of the 210-DX and is formed to ensure the user's hand does not slip while sawing. The curved blade is hard chrome plated and taper ground. The curvature of the blade helps to keep it in the cut so no energy is wasted. The blade locking system is very simple catch which hooks onto the blade and locks in place.

Total length when open is 410mm and the saw only weighs 165grams.

1 per pack

ARS 27cm Saw in Sheath TL-27

Another very popular saw used in the orchards of the Western Cape in South Africa. Also known as the CAP-27 saw. This saw has a 2-Way tilt grip and Super Turbocut teeth on the 270mm blade to increase productivity during the pruning season. The 2-Way tilt grip [the angle of the blade is changed with a thumb operated lever] facilitates pruning trunks, or branches, high or low or at any angle. The specially set teeth, immune to sawdust deposit, cut easily and smoothly into green wood, either straight, across or diagonally to the grain. The lightweight, easy to carry sheath has dual rollers at its mouth which firmly hold the saw, even when turned upside down. The rollers also help the saw to be pulled out of the sheath smoothly, without damaging the teeth.

Weighing only 200grams, and with a die cast aluminium handle covered with rubber, you can prune effortlessly without fatigue.

1 per pack

ARS 32cm Saw in Sheath UV-32E with curved blade

This saw is specifically designed for arborists, but is just as effective when used in fruit orchards and landscaping applications. The rubber coating on the ergonomically designed grip, makes sawing a pleasure. The 32cm blade is taper ground, impulse hardened and hard chrome plated which results in superior durability and hardness. Due to the fact that the UV-32E saw has a "Super Turbocut" tooth design smooth cutting performance is enhanced when cutting wood horizontally, vertically or any other angle. The saw is sold with a sheath that has a guide roller to ensure smooth movement of the saw into and out of the sheath. The sheath helps to prevent injuries and is handy for tree climbing. The belt clip on the sheath is reversible, enabling left and right handed users to use the saw with comfort.

Pruning & Cutting

ARS 32cm Wooden Handled Saw PS-32LL

This saw, also known as the CAP-32, excels when used in orchards and is recommended for use in olive trees. The saw can be used to cut branches up to 9"/225mm in diameter, utilising a longer tooth pitch than the other saws on offer, over a long 32cm blade. The hard chrome plating eliminates rust and resins will not cling to the blade and green wood will not clog the teeth. A very comfortable, ergonomically curved, beech wood handgrip prevents hand slip and fatigue when pruning in the orchard and olive grove. This saw has a strong, broad blade which can handle some of the more demanding pruning jobs.

1 per pack

ARS LPA-30L Anvil Lopper

Long-reach professional orchard bypass lopper.

ARS Pruning Shear 130-DX

The 130-DX pocket pruner is a precision pruner for lighter duty pruning, especially suited for smaller hands. The hard chrome plated blades are precision ground to ensure smooth, clean and easy cutting. Due to the hardening process the blades last longer and withstand rust. The anatomically shaped handles, together with the angled cutting head make it easier to get into narrow spaces for precision pruning. Ideal for use in nurseries and for making cuttings. The rubber buffer and easy locking system make this a very simple, but effective pruning shear.

1 per pack

ARS Pruning Shear CB-8

The CB-8 pruners from ARS are very effective pruners with exceptionally sharp blades - even thicker branches or vines can be cut using these shears. The design of the shear allows the blade to open wide, with a relatively small grip opening. The upper handle of the shear is rubber coated to fit comfortably into the palm of the hand, eliminating fatigue. Heavy duty pruning in the orchard, vineyard or any horticultural application is handled with ease. The CB-8 is ideal for most pruning jobs in vineyards, nurseries and landscaping. Length: 20cm. Weight: 235g

The innovative locking system works on the basis of "squeeze and open". All the user needs to do is press the handles together and the spring-loaded locking catch will open up, allowing you to begin pruning. The catch will then stay open as long as you are busy.

Pruning & Cutting

ARS Pruning Shear V-8Z

The V-8Z pruners can be used for commercial pruning in vineyards, orchards and horticulture. We introduced these shears to the South African market during the 2009 pruning season and have had very positive feedback regarding their performance relative to price. The ergonomically shaped handles are die-cast aluminium for extra strength and the non-slip grip makes it easier to control the pruner during intensive pruning. The polyurethane cushions on both handles, together with the quality spring, ensure that the user's hand, wrist and forearm are not placed under excessive stress, leading to injury, during the pruning season.

Length: 20cm. Weight: 230g

The V8 and V9 pruners have the same innovative "squeeze and open" locking system that is used on the CB-8 and 9 pruners.

1 per pack

ARS Pruning Shear V-9Z

The V-9Z pruners can be used for commercial pruning in vineyards, orchards and horticulture. We introduced these shears to the South African market during the 2009 pruning season and have had very positive feedback regarding their performance relative to price. The ergonomically shaped handles are die-cast aluminium for extra strength and the non-slip grip makes it easier to control the pruner during intensive pruning. The polyurethane cushions on both handles, together with the quality spring, ensure that the user's hand, wrist and forearm are not placed under excessive stress, leading to injury, during the pruning season.

Length: 23cm. Weight: 265g

The V8 and V9 pruners have the same innovative "squeeze and open" locking system that is used on the CB-8 and 9 pruners.

1 per pack

ARS Sharpener File (for saws only)

The 9F-10 saw sharpener is available to help you maintain the sharp edge on the blades of your ARS saw during intensive use. The diamond profile of the file allows the user to get between the teeth on the saw and file them sharp. As with all professional tools the blades will get blunt/dull after intensive use and they should then be replaced with an original ARS blade. This will ensure your ARS saws give you many years of excellent use.

1 per pack

Bahco 2444 Carpenters Knife with sheath

Length 230mm / 9in. Multi-purpose knife with high quality stainless steel blade and bi-component handle. Polished stainless steel blade. Two-component handle for comfortable grip. The knife comes in practical plastic case with belt clip. Ideal for fishermen, hunters, leisure, work around the house and garden.

Pruning & Cutting

Bahco 384-6T Pole Saw

This pole pruning saw is also supplied with a steel tube handle enabling it to be used with 25mm diameter extension or telescopic poles [See below]. This saw does not have the hook on the end so is ideal for getting into dense trees or shrubs at height. Also easy to extract the saw from the plant once the pruning is complete.

Spare Blades as well as sockets are available for pole saws.

1 per pack

Bahco 385-6T Pole Saws

The 385 Pole saws are ideal for any pruning that has to be done at heights over 3m. They are supplied with a steel tube handle so they can be used with 25mm diameter extension or telescopic poles [See below]. The blade tip on these 2 models is extended into a hook to prevent the blade sliding out of the kerf while you are sawing.

TIP: This hook also comes in handy if you want to pull some branches out of the canopy after they have been cut.

There is a striking knife attached to the blade and handle to cut the bark before sawing through the branch, this will prevent the bark stripping and leaving your tree with an unsightly wound. The 385 saw has fileable teeth. Spare Blades as well as sockets are available for pole saws.

1 per pack

Bahco 386-6T Pole Saws

The 386 Pole saws are ideal for any pruning that has to be done at heights over 3m.

Bahco AP-3M 3m Aluminium Extension Pole

Bahco telescopic extension poles are available for use with the complete range of Bahco top pruners and pole saws.

1 per pack

Bahco Felling Axe FGS-1.6-810 Wood Handle

Felling Axes are heavier axes with longer handles and a thin edge, to cut easily into the wood when felling trees. These axes have head weights that range between 1Kg and 1,8Kg and the curved ashwood handles range from 600 - 800mm in length. Handles are secured to the head with a carbon fibre wedge as well as a metal ring wedge, and are replaceable.
Head: 1,6kg. Length: 800mm. Total weight: 2,275kg.

1 per pack

Bahco FP-3M 3m Fibreglass Extension Pole

Bahco telescopic extension poles are available for use with the complete range of Bahco top pruners and pole saws.

* The Fibreglass pole is ideally suited for use where there is a risk of coming into contact with electricity lines, while the aluminium poles offer durability. All poles are easily extended and locked in place with a simple twist on the sections, supplied with wing nuts for attaching Bahco pole saws.

1 per pack

Bahco General Purpose Axe HGPS-1.0-400 Wood Handle

Bahco hatchets are lightweight axes with a short handle which makes them easy to carry around and they can even be used indoors. The hatchets are ideally suited to situations where alien vegetation has to be cleared, due to its light weight. It is also ideal for chopping/splitting wood for your braai [BBQ] or fireplace. The head is equipped with a thin blade for an easier, finer cut. Head weights range from 600g to 1kg and the ashwood handle lengths range from 360mm to 400mm.
Head: 1,0kg. Length: 400mm. Total weight: 1,285kg.

Pruning & Cutting

Bahco P121-20 Secateur

This is a traditional and robust design secateur for gardening, landscaping and vineyard work. The 2 sizes make it a versatile tool for many cutting purposes, and the high quality Bahco blade ensures a clean cut every time. The locking mechanism is a simple wire clasp at the end of the handle that folds away while the tool is in use. The blade is replaceable.
Length: 20cm. Weight: 242g

1 per pack

Bahco P121-23 Secateur

This is a traditional and robust design secateur for gardening, landscaping and vineyard work. The 2 sizes make it a versatile tool for many cutting purposes, and the high quality Bahco blade ensures a clean cut every time. The locking mechanism is a simple wire clasp at the end of the handle that folds away while the tool is in use. The blade is replaceable.
Length: 23cm. Weight: 314g

1 per pack

Bahco P16-60 Lopper

The P16-60 lopper from Bahco is lightweight and robust. Probably the most popular bypass lopper in South Africa for use in vineyards. The blade has the "double radii" design feature also found on the P19-80 lopper, giving quick and powerful cuts. A robust counter blade also helps to finish the cut smoothly and easily while the rubber buffers between the handles help to prevent fatigue, reduce injuries to the elbow, and enhance the comfort of the user.
Length: 60cm. Weight: 992g
40cm short handle, and 70cm long handle versions available on order

1 per pack

Pruning & Cutting

Bahco P160-SL-75 Lopper

Long-reach professional orchard bypass lopper.

Bahco P280-SL-80 Heavy Duty Lopper

The heavy duty P280 is the latest lopper from Bahco, and their first with a lever action cutting system. The 80cm handles are made from super light aluminium to reduce weight, but there is no compromise on strength. Rubber buffers are included to ease the shock on the user's wrists and forearms. The lever action cutting system makes cutting up to 50% easier.
Length: 80cm. Weight: 1320g

1 per pack

Bahco P34-27A Tree Pruner

The P34-27A top pruner is the lighter duty top pruner available from Bahco and is ideally suited to gardeners and professional users with less demanding applications. The P34-27A also has a fully hardened blade together with a stamped, hardened counter blade. On the P34-27A the counter blade is replaceable. A sap groove on the counter blade prevents sticking. The steel clamp tightens with screws enabling the user to fit the tool to a pole with a diameter of 25mm. Delivered with a rope.

1 per pack

Bahco P34-37 Tree Pruner

We believe the P34-37 is the best top pruner available on the market today, satisfying even the most demanding users. It has a fully hardened, double-bevelled blade and a stamped fully hardened counter blade. The sap groove prevents the blade sticking, eliminating wasted time and effort. The triple action pulley and lever action gives an amazing amount of cutting power. One of the great things about the P34-37 is that it has an adjustable clamp which means it can fit onto poles with diameters ranging from 25mm to 35mm. Another nice feature is the ability to mount a pruning saw blade on top of the pruner as seen in this picture. By doing this you can saw occasional branches without having to remove the P34-37 from the pole and mount a complete pole saw in its place.

When using the top pruner the user places the counter blade over the branch being cut and upon pulling the rope the blade will cut from below which ensures the falling limb does not pull a strip of bark off the tree. Delivered with a 5m rope and plastic toggle/handle, and can be mounted on any of the poles described below.

Pruning & Cutting

Bahco P51 Hedge Shear

The P51 is a high quality hedge shear for professional use in parks, vineyards, estates and particularly for topiary art work. These hedge shears are highly rated and our customers that use them are convinced they are the best shears available. Reduced fatigue through superior cutting performance and very comfortable handling.

Length: 57cm. Weight: 1080g

1 per pack

Bahco P51-SL Light Handle Hedge Shear

The SL range is fitted with new light weight aluminium handles to reduce fatigue, while adding strength. For use in parks, vineyards and estates. Includes serrations on the one blade for cutting thicker branches. Reduced fatigue through superior cutting performance and very comfortable handling.

Length: 57cm. Weight: 990g

In addition to the above hedge shears Bahco also manufactures 2 long handled edge shears for the gardener or landscaper.

1 per pack

Bahco P51H-SL Long Handle Hedge Shear

The P51H has the same stamped and fully hardened blades as the P51 hedge shear. The handles are 36cm long for extended reach and cutting range. When using the P51H with its longer handles you can often eliminate the use of a ladder.

Length: 73cm. Weight: 1230g

In addition to the above hedge shears Bahco also manufactures 2 long handled edge shears for the gardener or landscaper.

1 per pack

Bahco P74 Lawn Shear

The P74 lawn shears have a "ducks foot" design for cutting grass while standing. As with the P75 the blades are fully hardened and very sharp. For comfort the steel handles are fitted with rubber grips and have a rubber "bumpers" to minimise shock on the wrists.

The length of the tool is 109cm

Pruning & Cutting

Bahco P75 Lawn Edge Shear

The P75 edge shears are very handy for cutting lawn edges without having to bend down or get on your hands and knees. The blades are fully hardened for longer life and the steel handles are equipped with comfortable rubber grips. The length of the tool is 99cm.

1 per pack

Bahco SE-16-21 Economy Bow Saw

Bahco has manufactured saws for more than 130 years in the world's largest handsaw factory in Sweden. Continuous development work, in close co-operation with professional experts, is a vital ingredient in the quest for developing new and better saws and Bahco is a world leader in the manufacture and supply of premium bowsaw blades.

Bahco ERGO bowsaws are made from high quality steel and protected by a coating of high-impact enamel paint.

The Ergonomic, integrated handle makes sawing effortless and comfortable at the same time.

The innovative, easy-to-use tension mechanism allows for maximum tension and safe handling. This high blade tension, up to 120kp, is critical for best performance and straight cutting.

The virtually unbreakable hand guard makes knuckle and hand injuries a thing of the past.

These bowsaws are manufactured from lighter metal tube than the FORCE range but still have the same high quality blade that Bahco is famous for. The best quality blade is essential for successful cutting.

The saws are available in 530mm length and are fitted with "type 51" blades which are used for effortless cutting of both dry and green wood. A plastic knuckle protector is also supplied.

1 per pack

Bahco Secateur P1-20

The Bahco P1-20 is an ergonomically designed garden pruner with a medium handle and a medium cutting head.

Dura Cut & Hold Shear

High quality pruner especially suited for roses. With cut and hold feature to facilitate easy cutting of flowers for the vase, and rapid harvesting in commercial applications.

Fully serviceable, spare parts are available
High grade forged carbon steel blades assure sharpness & longevity
Robust lightweight aluminum handles with built-in center adjustment
Forged steel hook & sap groove, keeps a sharp edge, easy to sharpen
Unique 2 stage opening control, allows full opening for normal use and restricted opening for repetitive smaller cuts - helps to reduce R.S.I.
Open spring design, ideal when used in and around soil

1 per pack

Felco 11

Superbly balanced, the Felco 11 offers a large cutting capacity and has an ergonomic, hand-fitted design. The narrow, pointed anvil blade allows easy access to twiggy branches and ensures a close cut to the trunk. An adjustable locking segment allows precision alignment of the easily replaced blade. Cleverly designed with shock absorbers, wrist fatigue is a thing of the past. Length: 8 1/4 inches (21cm) Weight: 8.5oz (240g).

1 per pack

Felco 2

This is the original Felco pruner design, and has remained unchanged for over forty years. Imitated the world over, this popular model, like all the other Felco models, continues the fine Swiss tradition of workmanship. Solid-forged metal alloy handles are complemented by a replaceable, precision-hardened cutting blade and an anvil blade with a sap groove. The hardened nut and bolt assure exact adjustment of both the cutting and anvil blades. Designed with a rubber cushion and shock absorber, the Felco 2 provides smooth cutting with little effort. Length: 8 1/2 inches (21cm) Weight: 7.8oz. (220g).

Felco 300 (for cutting flowers and fruit)

Picking and Trimming snips.
The cutting head is specifically designed for a precise, clean cut.

1 per pack

Felco 310 (for cutting flowers and fruit)

Picking and Trimming snips.
The slender cutting head allows easy access to fruit and flower stems.

1 per pack

Felco 4

This model offers the same quality cutting blade and long-lasting aluminum alloy-coated handles as the Felco 2. The blade adjustment is only by the center nut and bolt. It lacks the rubber cushion, shock absorber, and locking segment, yet it remains a fantastic pruning tool available at a lower cost.
Length: 8 1/4 inches (21cm) Weight: 7.8oz (220g).

1 per pack

Felco 5

This is the most basic Felco pruner with excellent cutting ability. With handles made from solid steel and simplified construction, it is an ideal choice for the home hobby gardener. Lacking amenities such as the cushion stop, sap groove, and wire-cutting notch, this tool is simple and efficient.
Length: 9 inches (225cm) Weight: 11oz (310g).

Pruning & Cutting

Felco 50 Sheep Hoof Shear

Reliable: comfortable, light, sturdy handles made of forged aluminium with a lifetime guarantee* / blade and screw mounted anvil blade made of high-quality hardened steel / clean, precise cut / all parts can be replaced. Easy, durable cutting adjustment / Protection against the risk of hoof infections thanks to blades coated with XYLAN®. Hand and wrist protection, and optimisation of the force exerted are provided by the revolving handle, the angled head and the cushion-shock absorber / non-slip coating.

1 per pack

Felco 51 Sheep Hoof Shear

Comfortable, light, sturdy handles made of forged aluminium with a lifetime guarantee* / blade and screw mounted anvil blade made of high-quality hardened steel / clean, precise cut / all parts can be replaced. Easy, durable cutting adjustment / Protection against the risk of hoof infections thanks to blades coated with XYLAN®. Hand and wrist protection and optimisation of the force exerted are provided by the ideal shape of the handles, the angled head and the cushion-shock absorber / non-slip coating.

1 per pack

Felco 7

Perfect for you or the gardening pro in your life, the rotating handle revolves on its axis, allowing your fingers to move naturally, thereby reducing the blisters and hand fatigue that so often accompany prolonged pruning work. This unique swivel action requires up to 30 percent less effort than conventional models and offers maximum comfort. Both the cutting and anvil blades are smooth and the narrow, pointed blade design allows for close, precision pruning. Length: 8 1/4 inches (21cm) Weight: 10.2 oz (290g).

1 per pack

Felco 8

Felco itself states that this pruner sets the standard for high leverage and effortless pruning. It is identical to the Felco 7, except for the rotating handle that allows for left-handed use. Light alloy handles are shaped to act as an extension of the forearm and the anvil blade handle is designed to prevent the pruner from sliding through your hand. Hollow-ground, this Swiss precision-hardened steel blade features a wire-cutting notch. The blades are set on dowel pins for easy maintenance and replacement. Length: 8 1/4 inches (21cm) Weight: 8.7oz (245g).

Pruning & Cutting

Plastic Olive Rakes

Use this Olive rake to harvest your olives. Simply drag the rake through the tree and the ripe olives will be harvested. The rake has 9 soft plastic fingers to increase your harvesting efficiency. The hollow handle allows for optional mounting on a 20mm wood or steel pole so olives that are out of reach can be harvested without the use of a ladder.

1 per pack

Pruning Tree Seal (20lt)

By using the Pruning Seal it will form a barrier that prevents disease and insects that can enter through pruned areas. It forms a barrier so trees can heal safely. This pruning sealant is applied to pruning wounds after the cut has been made. The film that is created will create a barrier that will help to prevent diseases and insects from getting into the freshly cut wood which affects the health of the plant in the next growing season. Will also assist with the healing process.

20 litres

Red Rooster Vine Lopper

Vine lopper.

Cutting capacity: 30mm. Total length: 700mm

Super-alloy hardened steel cutting blade. Drop forged hardened counter blade. Sap groove reduces friction and blades sticking. Rubber buffers cushion impact and reduce fatigue.

1 per pack

Stainless Steel Snips (Short)

This is a light duty snip/scissor that is ideal for use when cutting flowers and when making cuttings in a nursery environment. The stainless blades stay sharp and one of the blades is serrated. Very light and comfortable to use, spare springs are available.

Total length: 15cm
